Professional Summary

Computer Science and Engineering student specializing in Cybersecurity, with hands-on experience in Python, FastAPI, Docker, Linux, REST APIs, and security tooling. Interested in software engineering, cloud infrastructure, and building reliable security-focused applications.

Education

Sri Sairam Institute of Technology Expected Graduation: 2028
B.E. in Computer Science and Engineering (Cybersecurity)
CGPA: 7.79/10

Technical Skills

Programming:	Python, C, SQL, Bash
Backend Development:	FastAPI, REST APIs, SQLite
Frontend:	React, JavaScript, HTML, CSS
Infrastructure:	Docker, Linux, Git, GitHub
Security:	Network Security, Vulnerability Assessment, OWASP Top 10, SIEM Fundamentals
Security Tools:	Syft, Cosign, Docker Scout, Wireshark, Nmap, Burp Suite

Experience

DevOps & Containerization Intern Oct 2025 - Nov 2025
Vectra Technosoft Pvt. Ltd., Chennai

- Containerized a To-Do application using Docker and deployed it in a Red Hat Enterprise Linux environment.
- Practiced Docker networking, Linux administration, and containerized application troubleshooting.

Technical Projects

ChainProof - Software Supply-Chain Security *Python, FastAPI, React, Docker*

- Built a platform to assess container image integrity and software supply-chain security risks.
- Integrated SBOM generation, vulnerability scanning, and container signature verification using Syft, Docker Scout, and Cosign.
- GitHub Repository: https://github.com/Harikmar2005/Chainproof

OfferGuard - AI-Powered Recruitment Fraud Detection *React, TypeScript, Node.js, Express*

- Developed an investigative platform to assess job and internship offers for recruitment fraud, suspicious payment demands, and impersonation risks.
- Implemented configurable risk scoring, DNS A/MX verification, evidence-chain tracking, and role-based access control using JWT authentication.
- Integrated Google Gemini for offer analysis and evidence-grounded investigation Q&A, with SQLite persistence for investigation records.
- GitHub Repository: https://github.com/Harikmar2005/offer-guard

Vallam - Farmer Support Navigator *React, TypeScript, FastAPI*

- Developed a bilingual farmer-support navigator for discovering agricultural schemes and checking eligibility using explainable rule-based matching.
- Designed document-readiness checks and personalized step-by-step support pathways for farmers.
- GitHub Repository: https://github.com/Harikmar2005/valam

Certifications

- Red Hat Certified System Administrator (RHCSA) - Completed
- Certified Ethical Hacker (CEH) v13 - In Progress

Additional Information

Areas of Interest: Software Engineering, Cloud Security, DevSecOps, Application Security, AI Security
Languages: English, Tamil
